

ABOUT MOON AREA SCHOOL DISTRICT

Moon Area School District (MASD) offers a 30-acre secondary campus in Allegheny County, which utilizes state-of-the-art technologies to foster student learning and support program development.

MASD educates almost 3,000 students who attend classes in seven buildings, including one high school, one middle school, and five elementary buildings, each containing specially designed spaces for twenty-first century learning.

ACADEMICS

Over 500 District staff members are committed to helping all students reach their full potential for success. Moon Area Students consistently perform above state and national averages on standardized testing. Course offerings at each grade level reflect a broad scope of opportunities for students to attain a well-rounded education. By cultivating critical thinking and problem-solving skills, students can attain the tools necessary for college and career success.

INNOVATION

Technology plays an integral part in interactive learning. With this in mind, Moon Area High School utilizes a “one-to-world” approach that provides each high school student with a laptop. Increased availability of updated technology in all buildings allows students to apply classroom concepts to hands-on activities via technology, and leveraging powerful technology tools allow teachers to deliver meaningful, relevant instruction to each student.

The STEAM Engines program is a solution to integrate STEAM (Science, Technology, Engineering, Art, and Math) learning into each of the five elementary schools in the District. By freeing up five teachers one day per week for concentrated STEAM instruction, they become the human engines driving us toward innovative learning. Each teacher is able to become an expert in projects and technology geared for a targeted grade level to deliver a six-week unit that pushes twenty-first century skills across the District.

OPPORTUNITY

The District recognizes that student interaction in activities during and after school hours teaches valuable lessons not available in the classroom, including a wide variety of academic, co-curricular, and extra-curricular options in musical and athletic endeavors at all levels. Additionally, we have provided after-school STEAM enrichment opportunities for our elementary schools. MASD partners with local experts to incorporate hands-on learning experiences for students. We continuously enhance and expand these opportunities for student success.
